WHO WE ARE

Extruwood, a division of South Africa's leading PET recyclers, Extrupet, is a company dedicated to creating high quality wood alternatives, made from 100% recycled plastic. Established in 2013, the company seeks to provide durable and environmentally friendly products across various industries.

WHY PLASTIC?

With global deforestation and the high costs of wood importation, South Africa **needs** sustainable alternatives to natural wood for the manufacture of pallets, furniture, poles and other items. Reprocessed plastic not only creates a superior product; it allows for a big reduction of carbon emissions and supports the entire recycling industry.

The longevity of the plastic product counters the initial capital outlay, with considerable savings over time – a real value for money product!

8 REASONS TO CHOOSE EXTRUWOOD PRODUCTS OVER NATURAL WOOD:

- Longer life span – in some instances, 20 times longer than wood
- More durable – it doesn't splinter, warp or damage easily
- Maintenance free – reduces labour costs
- Impervious to bacterial, fungal, chemical and insect contamination
- Waterproof and resistant to any sort of weather
- Easily sanitised and odour resistant – ideal for food industry
- Customisable sizes to suit specific spaces
- Fully recyclable back into the plastic value stream

**PALLETS • PARK BENCHES • PICNIC TABLES • DECKING • FENCING AND POLES • DUSTBINS • JUNGLE GYMS
WALKWAYS • BRIDGES • AND OTHER CUSTOM REQUESTS**

COMPOSITION – 100% RECYCLED PLASTIC

- HDPE (bottles and caps)
- LDPE (bottles and other)
- PP (labels)

THE TRIPLE BOTTOM LINE PROMISE:

- Environmentally compliant
- Preserves SA's wood reserves
- Massive cost savings

CORPORATE ADVANTAGE

As environmental reporting becomes regulation, using wood alternatives like these can contribute to carbon emission savings, forming part of the carbon disclosure reports for large corporates.

Projects like the one in Century Bottling, Uganda, where we supplied 2 000 pallets, to be assembled by their workforce, form part of Corporate Social Responsibility.
